# Helping Kids Make a Splash with Confidence in Our Swimming Classes

Swimming isn't just a skill; it's a life lesson that starts early and stays with you forever. At AquaBuddies, we offer **swimming classes for kids** that are designed to be as fun as they are educational, ensuring that little ones build confidence in the water from the very beginning.

For our youngest swimmers, the Pink Ducklings class (6-12 months) offers an enchanting introduction to the pool. With gentle guidance, babies learn the basics of water safety, including safe entry and exit, while also exploring the joys of floating and paddling. It's a precious time for parents and babies to bond and discover the water together.

As your child grows, our Yellow Ducklings (12-18 months) class helps them develop more independent movements and social interactions.

We focus on building essential skills like paddling with a noodle, floating, and longer submersions—all through playful games that make learning a delight.

For toddlers ready to take the next step, our Brown Ducklings (18-24 months) and Starfish (2-4 years) classes continue to build strength, confidence, and water safety awareness. By the time they transition to independent swimming, they'll have the foundation they need to thrive.

At **AquaBuddies**, we're here to make every splash count, guiding your child through a safe and exciting journey in the water.
